

# Bēssā

A Collection by Curio d'art

- Jenny Majmudar

# About the collection

Bēsō is a **collection of sustainable furniture pieces** with deep roots in the bespoke world. Bringing to you innovative products **handcrafted by artisans**, unique as only a handmade piece can be, conveying the ingenuity and passion of the artisans.

We believe the craft sector is the only industry that has held on to the importance of human interaction alive in an increasingly machine oriented world. It **sustains on human contact at every phase of the design** process, and this is what has preserved its significance and uniqueness in the modern world.

The Lack of handmade products and the **growing need to revive Indian artisanship** brought us to introduce our own collection of **timeless furniture** with an ambition to bring to you exclusively handcrafted pieces by our Karigars (Artisans) who take immense pride in creating each piece.

# About the Designer

Jenny Majmudar studied Interior Architecture at Savannah college of Art and Design (SCAD) and has worked as a designer at HBA (Hirsh Bedner associates), Los Angeles in the Hospitality Design Industry. These interests and experiences became steppingstones to take her creative skills to the next level in building her own design firm Curio d'art.

She believes that **honoring history, craftsmanship, Functionality and our surroundings** is the only imperative to pushing the boundaries and challenging the rules of design.

Her philosophy is to **create beauty through thoughtful design by staying authentic and persist consistency with this core idea to deliver irresistible design solutions.**

# Sustainability

Doing right by the environment is an increasingly important part of our design practice. When we create our products, we strive for the best holistic harmony between culture and nature, as we believe that it is the right thing to do.

# Our Values

We believe good value is about staying useful over time. With our collection, your investment in good furniture will go far. We take a world-view on environmental issues and believe in sourcing and treating the raw materials we use with respect and care. Curio d’art is dedicated to creating responsibly and fairly, for everything we make and everyone that works for us.

“Designing to do good not to just create less harm”

# Materials

## Reclaimed Teak Wood

Our wood is filled with history and is full of character. Our reclaimed teak wood is sourced from century old houses from the local old towns of the city, before being repurposed and crafted into new pieces. The wood comes from the columns and beams from the old house that are over eighty years old and of very high quality. Repurposing wood is an elaborated process.

## Natural Polish

We Select Healthy and Environmentally Sound Clear Wood Finishes for our products, and hence we only use Natural Raw oils that come from renewable resources that are durable compared to other finishes. We are against using any other polishing alternatives because they contain high levels of volatile organic compounds (VOCs), which contribute to air pollution and can cause health problems.

## Handwoven Cane

Sustainably Harvested from natural forests in East and south of India, our cane is a highly durable and good quality. Our skilled artisans. meticulously weave the cane by hand using a particular technique. It is later treated with a kiln dry machine, to make the cane better and durable.
